

help hurth transmission problem ericson yachts - help hurth transmission problem i have had a tranny problem arise and would appreciate any suggestions and thoughts the hurth hbw 10 or maybe it is a 5 starts making a grinding sound above 1800 rpm s usually run the 5432 2275 the sound is kinda like when a standard auto tranny shift is missed, **zf marine transmission troubleshooting justanswer** - zf hurth transmission in my 346 carver knocking sound when idling in gear at 1200 rpms quiet at 3000 rpms same sound and motor starts to lose power my question is could the transmission be causing the loss of power to the engine or do i have 2 problems i was told by a mechanic the loss of power was probably the fuel pump, **hurth transmission problem sailboatowners com forums** - the engine runs fine and i think the clattering vibrating noises i heard were just the result of the engine being run at a higher rpm without load once the transmission failed the transmission is a hurth hbw 50 2 1 mounted on a universal m 20 engine looking forward to your responses thanks, **hurth transmission problem cruisers sailing forums** - possibly the damper plate springs collapsed free ing up in reverse and running ok binding in forward and stalling the engine i have the hbw 150 and the gear selection from forward to reverse uses the full 3 tavel of the cable but will engage the drive mode with 1 of travel either side of transmission lever vertical travel hope this helps, **630a hurth transmission removal bayliner owners club** - 630a hurth transmission removal collapse x 562 16 10 14 2015 06 08 pm my trannys also rattle when gear below 600 700 rpm however i never run that low rpms so problem solved two c s 1990 3888 my the back of the engine because the motor mounts bolt to part of the flywheel cover that has to come off then for the transmission, **zf hurth transmission problem maintenance tech info** - a problem with my zf hurth this weend almost lead to a bigger problem on the last run of the day i noticed a delay when shifting into reverse the throttle would rise before it would shift into reverse i figured the linkage had slipped a little bit as ive had to adjust the linage in the past, **do all hurth transmissions suck need advice on a new** - thanks to you three who have posted replies i took the transmission apart and the problem was a blown tapered bearing see pics it is probably simply due to age of the transmission i talked with mack boring in new jersey and have ordered a new hurth hbw 100 new damper plate new flex coupling and new water cooler also asked for a hose, **hurth hbw100 problems sailnet community** - hurth hbw100 problems hi my hurth gear with 300 hours on it slipped the other day i have a 25hp 2008 universal it slipped when going from idle forward to 1500 rpm it kicked in with a clunk at the higher rpms assuming i get a new transmission any advice on how to keep it in good health would be appreciated i don t want to have to, **marine transmission service harbor marine** -
